

START UP GUIDE

Placing you on the map of cryptocurrency investments

Please note:

CryptoMap aims to make this guide as clear and concise as possible to ensure you are able to successfully set your accounts up. However, please do not hesitate to contact us through our social media platforms or by email if you require further help or have any questions you would like to ask us regarding the guide or any other matter.

Disclaimer:

The CryptoMap start up guide is solely a guide to setup. In no way are we advisors, we provide guidance to help you begin investing in cryptocurrency. In this guide we provide information on how to set up three currently highly recommended platforms for purchasing and exchanging cryptocurrency. The individual decides upon choosing what accounts they decide to use.

Introduction

Hello and welcome to your CryptoMap Start up guide, Cameron will be the CryptoMap Assistant guiding you through the process.

The first step on your Crypto journey is the set up and verification of three different accounts.

The three accounts in this guide are;

1. **Coinbase:** <https://www.coinbase.com>
2. **GDAX:** <https://www.gdax.com>
3. **Binance:** <https://www.binance.com>

How to set up your accounts

STEP 1.

Coinbase account setup

We recommend you set up your Coinbase account through the Coinbase referral program by clicking the link below.

<https://www.coinbase.com/join/5a319d4b4a0d94019388f343>

How it works:

By clicking the Coinbase referral link above you and the individual who referred you (CryptoMap Assistant, Cameron) will both receive a free \$10 (or equivalent in your domestic currency) from Coinbase when you spend \$100 within 180 days of opening your account. The free \$10 is helpful to ensure we are able to continually help people successfully create their accounts by using our free content and platforms. It is a valuable component of us continually improving our service. Furthermore, you also receive a free \$10, which can go a long way in the world of crypto currency investment, it really is a no brainer!

Further information on the referral program can be found by clicking the link below:

<https://support.coinbase.com/customer/en/portal/articles/683805-the-coinbase-referral-program>

When you have successfully followed the first steps of creating your Coinbase account you will be required to provide a form of ID verification (Passport, Driving License or ID card) and to link a payment method (Bank account, PayPal or Credit card) to enable you to start purchasing your cryptocurrency.

Once your ID has been successfully verified by Coinbase (note this can take up to 24 hours' dependent on how busy Coinbase is and the quality of your photo) you will be able to add your payment method. Once this is completed you have successfully set up your Coinbase Account. You can then go through the settings and adjust your preferences to your personal choice.

Coinbase currently allows for the purchase of Bitcoin, Bitcoin Cash, Ethereum and Litecoin if you are looking to only purchase these cryptocurrencies you do not need to go any further and can begin purchasing these cryptocurrencies using Coinbase, we also provide a guide on how to safely and efficiently purchase cryptocurrency using Coinbase, so feel free to send us a message to receive that guide.

However, to exchange the currencies you purchase on Coinbase with other cryptocurrencies you will need to continue following this guide in order to set up Binance which allows for a wider variety of coins and tokens such as Ripple (XRP), Stellar Lumens (XLM) etc.

STEP 2.

Activate your GDAX account

This step is fairly simple due to Coinbase and GDAX working alongside each other (GDAX essentially been Coinbase's wider variety exchange platform), you simply need to sign in to your Coinbase account and have it open in your browser. Open a new tab and go to the GDAX platform. You will then be able to simply click sign in on GDAX which will automatically sign you in, because you already have your Coinbase open.

The first time you do this you may initially be asked for some basic information. When you have completed this step you may then be asked for some Identification, however there is an option to skip. Coinbase has already identified you and therefore it is ok to skip all further steps.

You will now have a fully operating GDAX. And have completed two of the three accounts required.

***CryptoMap Tip** - GDAX allows free transfers between your Coinbase wallets and GDAX accounts. But here's the cool part, GDAX also allows free transfers to your Binance exchange account, saving you the fees required to transfer between Coinbase and Binance.

STEP 3.

Binance account setup

We recommend you set up your Binance account through the Binance referral program (similar to the Coinbase referral program) by clicking <https://www.binance.com/register.html>

You can set up your Binance account through the referral program by including our Referral ID: 13036800

How it works:

The screenshot below is the page you will be met with when you go to register a Binance account.

A screenshot of the Binance registration page. The page has a white background with the Binance logo at the top. Below the logo, the word "Register" is centered. There are four input fields: "Email", "Password", "Confirm Password", and "Referral ID (optional)". The "Referral ID" field is highlighted with a red rectangular border. Below the input fields, there is a checkbox labeled "I agree to Binance's Terms Of Use" and a "Register" button. At the bottom, there is a link "Already Registered? Login". The footer contains links for "Home" and "Support", a list of languages including "English", and a copyright notice "© 2017 Binance.com All Rights Reserved".

As you can see in the screenshot above you have an optional choice to enter a Referral ID, if you chose to register and chose to add our Referral ID we will receive 50% of your transaction fees from Binance, so rather than the full transaction fees going into the pockets of

Binance, 50% of the fee will go to us, which will be a valuable component of CryptoMap been able to continually improve our service at no cost to you!

(Note all exchange sites have a small transaction fee for exchanging and purchasing cryptocurrency. Binance is one of the LOWEST.

Once you have inputted your email, password and referral ID
Binance will send you a verification email.

***CryptoMap Tip** - check your spam folder if you do not receive the email.

By clicking the verification link your Binance account will now be successfully setup.

Once you have successfully followed the first steps of creating your Binance account and have successfully logged in and clicked your account you will have the option to set your 2-factor authentication using Google Authenticator. Binance will state the security importance of enabling this. For a full guide on how to enable your Google authentication click the following link.

<https://support.binance.com/hc/en-us/articles/115000433432-Google-2FA-Guideline>

***CryptoMap Tip** - When going through the above process in regards to setting up google authentication make sure you take a picture of your QR code and print (keep it in a safe place). People have been locked out of there Binance account because they have lost their mobile phone that contained the google authentication app, in doing so losing the continuously changing code to get in to their account. By having the QR code stored somewhere safe you ensure you always have a method to get back into your account. You would simply rescan that QR code using your google authenticator and enter the 6 Digit code that is provided.

In Binance you can choose to verify your account up to a level 3 status, this will allow you to have the highest withdrawal limit. Level 1 allows a withdrawal of 2 Bitcoins worth which is currently at the point of writing this around £20,000. The procedure is fairly simple after clicking get verified to level 1 - 3.

When you have successfully completed all these steps you will now have all 3 accounts setup and are ready to start investing.

Congratulations on the setup of your accounts, we hope you have found this guide clear and concise. We would kindly appreciate any feedback you can provide in order to continuously help us improve our service. For further information and guidance please do not hesitate to contact us through our social media platforms or by email.

Note:

We also offer a step by step guide on how to safely purchase, exchange, trade and safely store your cryptocurrencies.
